

Short CV

	BAROUKI ROBERT
	Professor of Biochemistry, Director of Inserm unit 1124
	University of Paris Descartes/INSERM
	France
	<p>Robert Barouki is a Professor of Biochemistry at the University Paris Descartes and head of the Inserm unit "Toxicology Pharmacology and Cellular Signaling". He also heads the metabolomics and proteomic biochemistry lab at the Necker Enfants malades hospital. He studies the impact of environmental contaminants on human health and their mode of action and he is involved in EU programmes on the exposome and mixture effects as well as on exposure and effect biomarkers.</p> <p>In a more general perspective, he has been involved in the networking of French and European research in the field of environment and health and he has a keen interest in communicating scientific concepts and data to a large audience.</p>
